ForgeRock Implementation specialists

Hiring organization
AUSTRAC

Employment Type
Contractor

Duration of employment
6 months

Valid through
17.07.2024

Reference
DM-24766

Description
Support the uplift in the identity Management (IdAM) deliverable.

Responsibilities

- Design and implementation of a transformational new user registration process.
- Provide guidance and advice as part of the technical requirement gathering and design considerations of the new registration process work. This may include user authentication, multi factor authentication (MFA) and password policies.
- Work with AUSTRAC Subject Matter Experts (SME's) on ForgeRock component configurations, service checks and ensure service stability for current and future workloads.
- Review current ForgeRock licensing components in use and provide an assessment plan on how AUSTRAC can optimise its service in the future.
- Guidance on how AUSTRAC can utilise ForgeRock for Role Based Access Control (RBAC) modelling in the future.

Qualifications
You must hold a current valid NV1 security clearance.

Experience
ForgeRock Implementation Specialists should have the following skills and experience:

Essential

- Proven experience as a ForgeRock Implementation Specialist, (i.e. developer);
- A good understanding of the ForgeRock product suite;
- In-depth knowledge of identity and access management (IDAM) concepts and protocols;
- Proficiency in Java and scripting languages;
- Experience with Web services and APIs;

Desirable

- Strong problem-solving skills with the ability to troubleshoot complex issues within the ForgeRock suite of products;
- Excellent communication skills, both verbal and written;**.**
