Full Stack / .NET Developer

Description

We are seeking skilled and energetic Full Stack / .NET Developers to work as part of an agile delivery team in one of our high-profile software development projects. This is a fast-paced environment, and we require enthusiastic, skilled, and professional Developers who have experience working on large, complex projects and delivering great outcomes. The successful applicant will have the opportunity to use leading edge technology and will be responsible for building, developing, and maintaining code in a large enterprise system on Azure Cloud.

Prior experience in application development of high-volume transactional systems, entitlement or calculation engines would be highly regarded.

Other responsibilities include:

- Participate in requirements analysis.
- Collaborate with solution teams and architects to produce software design and architecture.
- Write clean, maintainable, and scalable code following Departmental standards and practices.
- Work collaboratively within a cross functional team.
- Unit test and deploy applications and systems.
- Improve and maintain existing software.
- Develop documentation throughout the software development life cycle (SDLC).
