Qualifications
You must be citizen of Australia

Description
AMSA is seeking a Test Analyst to join a small team of testers. Working to the Test Lead, Project Manager/s or Program Manager, the candidates should be adaptable, as allocation will be across different test phases on several projects. You must have ability to quickly learn new applications, with excellent time management skills to plan, execute and report on multiple projects with parallel deadlines.

Responsibilities
As part of AMSA's test team, you will have the opportunity to work across latest technologies such as Dynamics(365), Intelledox forms, Digital application portal and other digital transformation projects. The role will require liaison and coordination of test activities with developers, business analyst and subject mater experts across different sections of AMSA (Operations, Infrastructure, Search & Rescue and IT Services). You must have excellent written and verbal communication skills and be confident in their ability to create test cases and triage defects found.

Experience

Essential criteria

1. Provide an example where you have actively tested a COTS product such as Microsoft CRM, SAP Concur

2. Provide an example demonstrating your ability and willingness to learn and adapt to changing technologies, roles and responsibilities within a transformative environment.

3. Provide a statement demonstrating how your skills and experience can successfully analyse requirements, plan & execute tests, raise & resolve defects in an organization using multiple test methodologies.

4. Should have ISTQB Foundation certification

Desirable criteria

1. Knowledge of any testing tool such as JIRA, DevOps

2. Knowledge of test automation
