

## Senior Angular and Nginx Infrastructure Engineer

### Reference

LH-03137

### Description

Infrastructure Engineers implement, manage and retire the infrastructure (including physical, virtual, networking and cloud infrastructure) that supports digital services. Infrastructure Engineer – Nginx

### Key Duties and Responsibilities

#### Infrastructure Setup and Migration:

- Design, configure, and optimize infrastructure Angular Nginx components required for PPC+ migration.
- Deploy and maintain systems using Angular Nginx Node.js, ensuring scalability and reliability.
- Support the integration and deployment of applications developed in Angular Nginx Node.js.
- Automate repetitive tasks and workflows to migrate Angular applications using Python scripting and GitLab (DevOps)

**Project Delivery:** ensuring timelines and quality standards are met.

**Knowledge Transfer:** Collaborate with internal teams to provide detailed documentation, training sessions and mentoring to ensure a seamless handover and knowledge transfer.

**Performance Optimization:** Monitor and troubleshoot system performance, ensuring the infrastructure supports the application effectively post-migration.

**Security and Compliance:** Ensure that all infrastructure configurations and deployments adhere to organizational security standards and compliance requirements.

### Experience

1. Must have experience in installing, configuring, customising and maintaining Nginx server applications.
2. Migration of Angular applications from Nginx servers to other platforms.
