

Senior Infrastructure Engineer

Description

CASA requires a highly skilled and experienced infrastructure engineer to serve as a dedicated escalation point for our current Network Project. You would be the primary contact to aid us in resolving complex technical issues, answering technical questions, and providing expert guidance on Fortinet SD-WAN, FortiGate, Azure NVA deployments, FortiClient, FortiSASE, and FortiSandbox. We expect the infrastructure engineer to possess deep product knowledge, exceptional troubleshooting abilities, and a proactive approach to problem-solving, ensuring timely resolution of any challenges that may arise during the project's implementation and beyond. This role is crucial in maintaining project momentum, minimizing downtime, and ensuring the successful deployment and ongoing operation of our network infrastructure.

Responsibilities

Key duties and responsibilities

1. Demonstrated Network Experience: Proven experience working in a contemporary, secure ICT environment with expertise in technical services, particularly in:
 - Azure Cloud Infrastructure
 - FortiGate Firewalls
 - Fortinet SD-WAN
 - Fortinet Azure NVA deployments
 - FortiClient
 - FortiSASE
 - FortiSandbox
1. Communication Skills: Highly developed written and oral communication skills, especially in discussing technical and strategic matters with non-technical stakeholders.
2. Attention to Detail: Demonstrated high level of attention to detail, including the ability to write detailed technical documentation.
3. Network Mapping: Ability to map data movements across network zones and cross-domain environments.
4. Visio Proficiency: Strong skills in creating detailed network diagrams using Microsoft Visio.

Qualifications

Must be an Australian Citizen

Experience

You must demonstrate capability to satisfy the specification of the requirements and experience in the delivery of the services required.
